

CREATIVE ART – YEAR 8

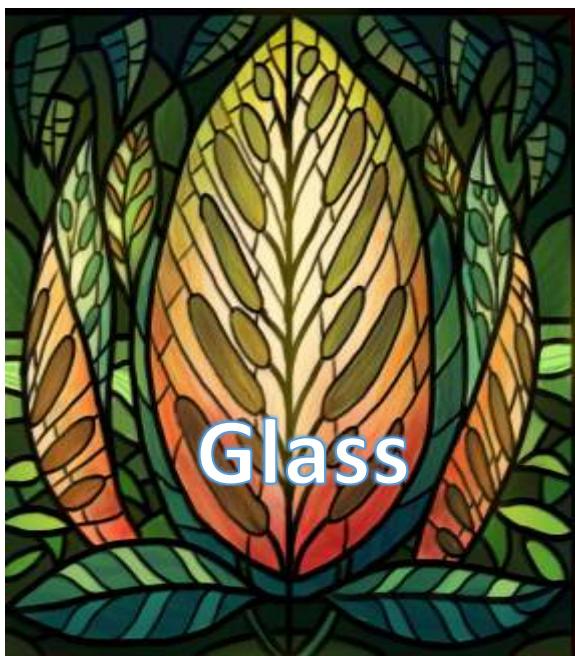

Drawing Skills

Miss L. Hayes

Focal points

- A focal point is something that you focus on and gives meaning to a building
 - Like arched windows or detailed doors
 - Patterns in the brick work
 - Spiral staircases, stained glass windows
- Sometimes we don't even realise what these are and without looking hard you can't always see them

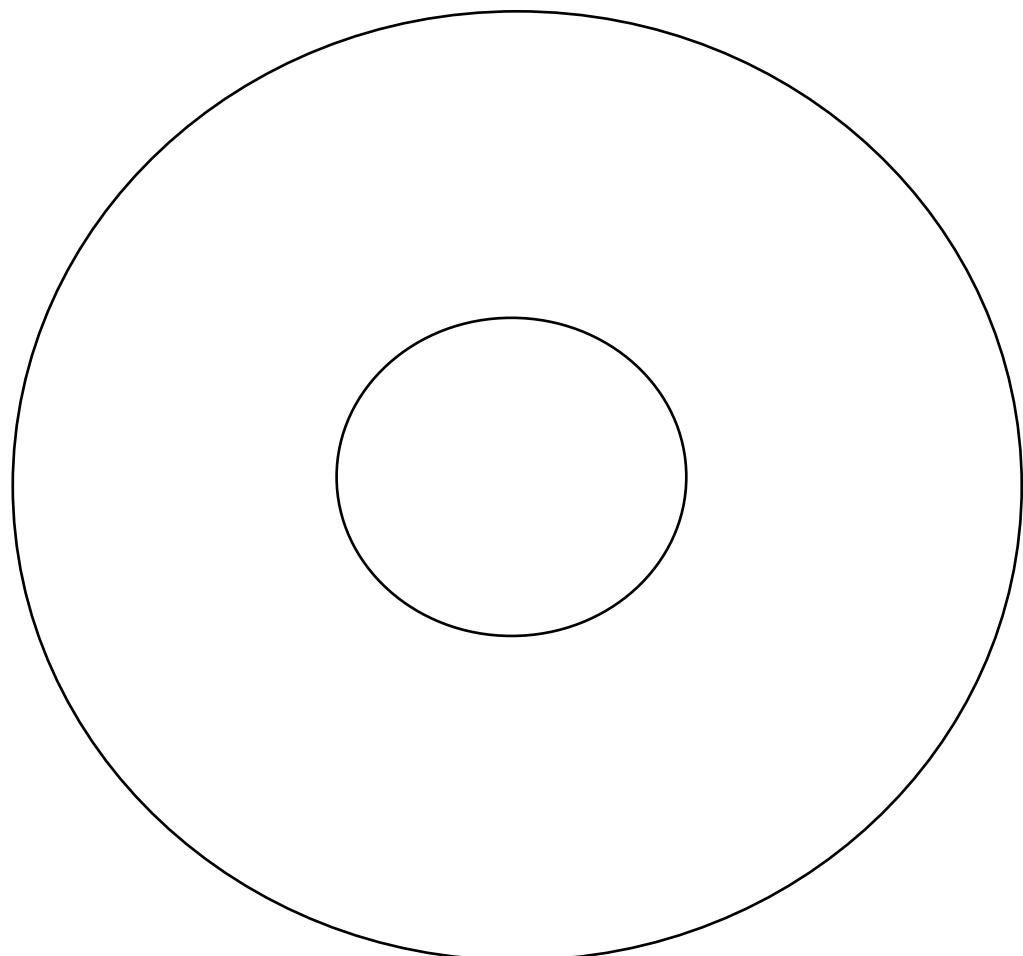

Windows

Using the circle as a starting point, draw the detailed window onto the page - circles can be hard so use something to draw round such as a cup or roll of cellotape.

Try to use a ruler or the side of a book to get the straight lines - Colour with a black pen or dark pencil.

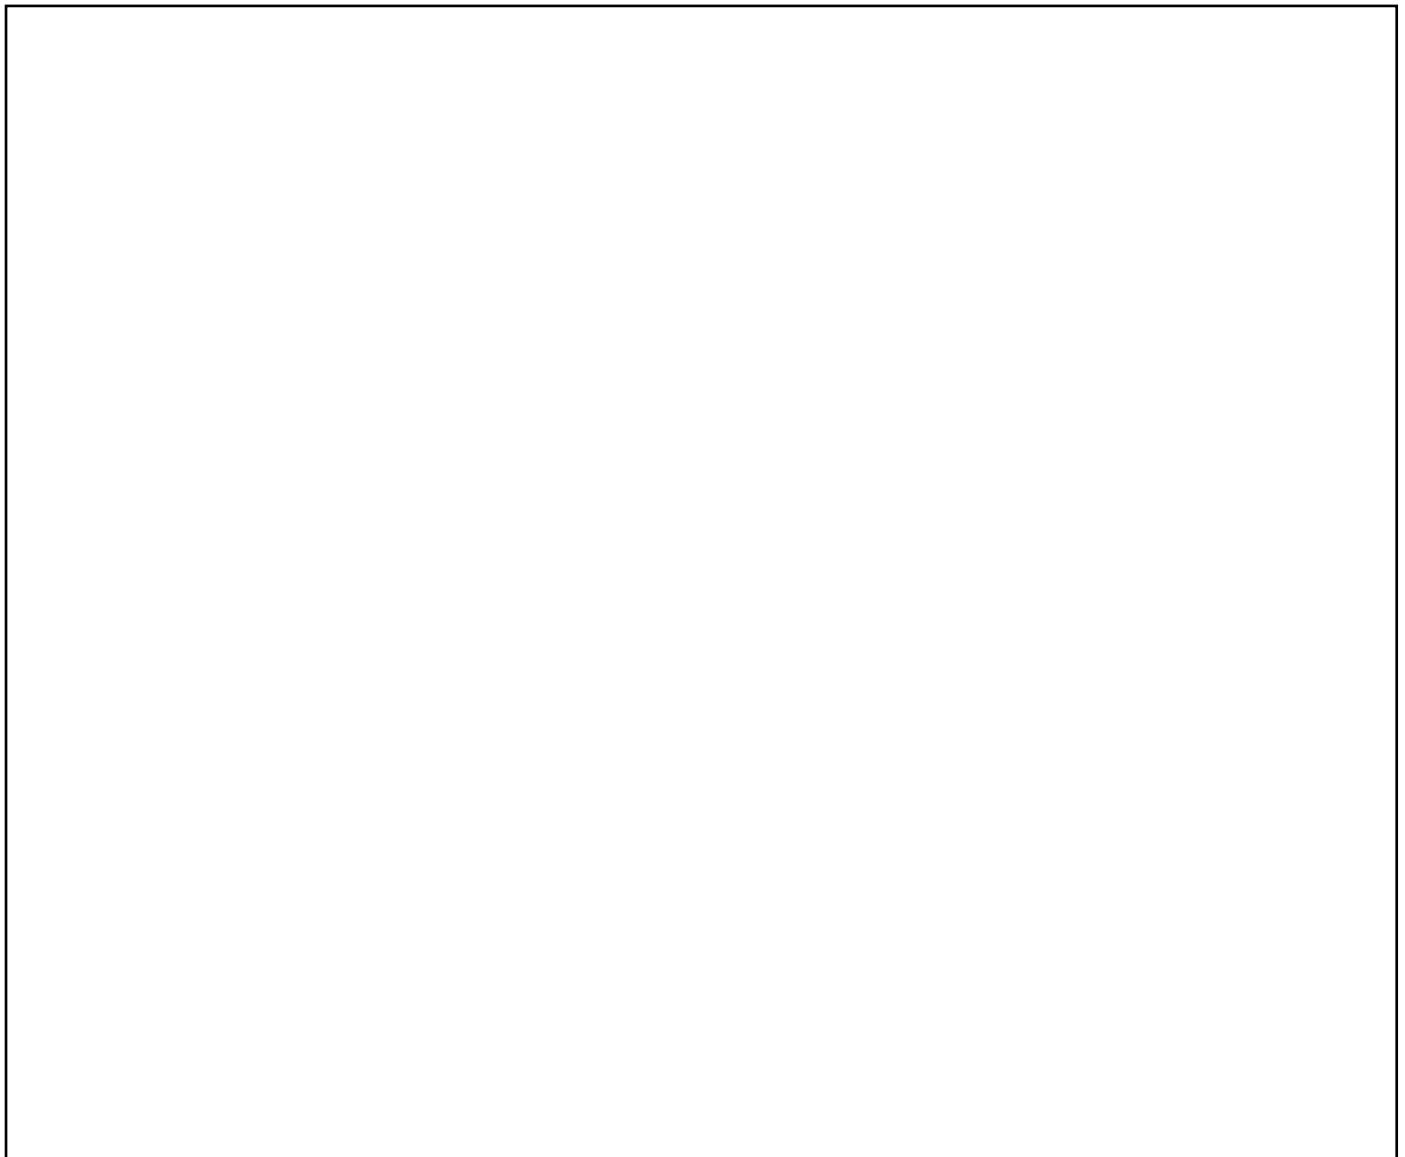

Stained Glass

Stained glass is used in lots of places, it can be used in churches to tell stories from the bible, or just used as decoration and pattern to uplift an area.

In the space bellow design your own stained glass window - it could be a pattern or based on something important to you. Make it bright and colourful and imagine the sun flowing through the glass.

Shapes & Designs

What makes a building amazing? The shape, the style and how it is dressed makes all the difference. Look at the hotel in the picture this was designed by the artist

Hundertwasser - He believed that no person was the same and that where we lived said a lot about us as individuals.

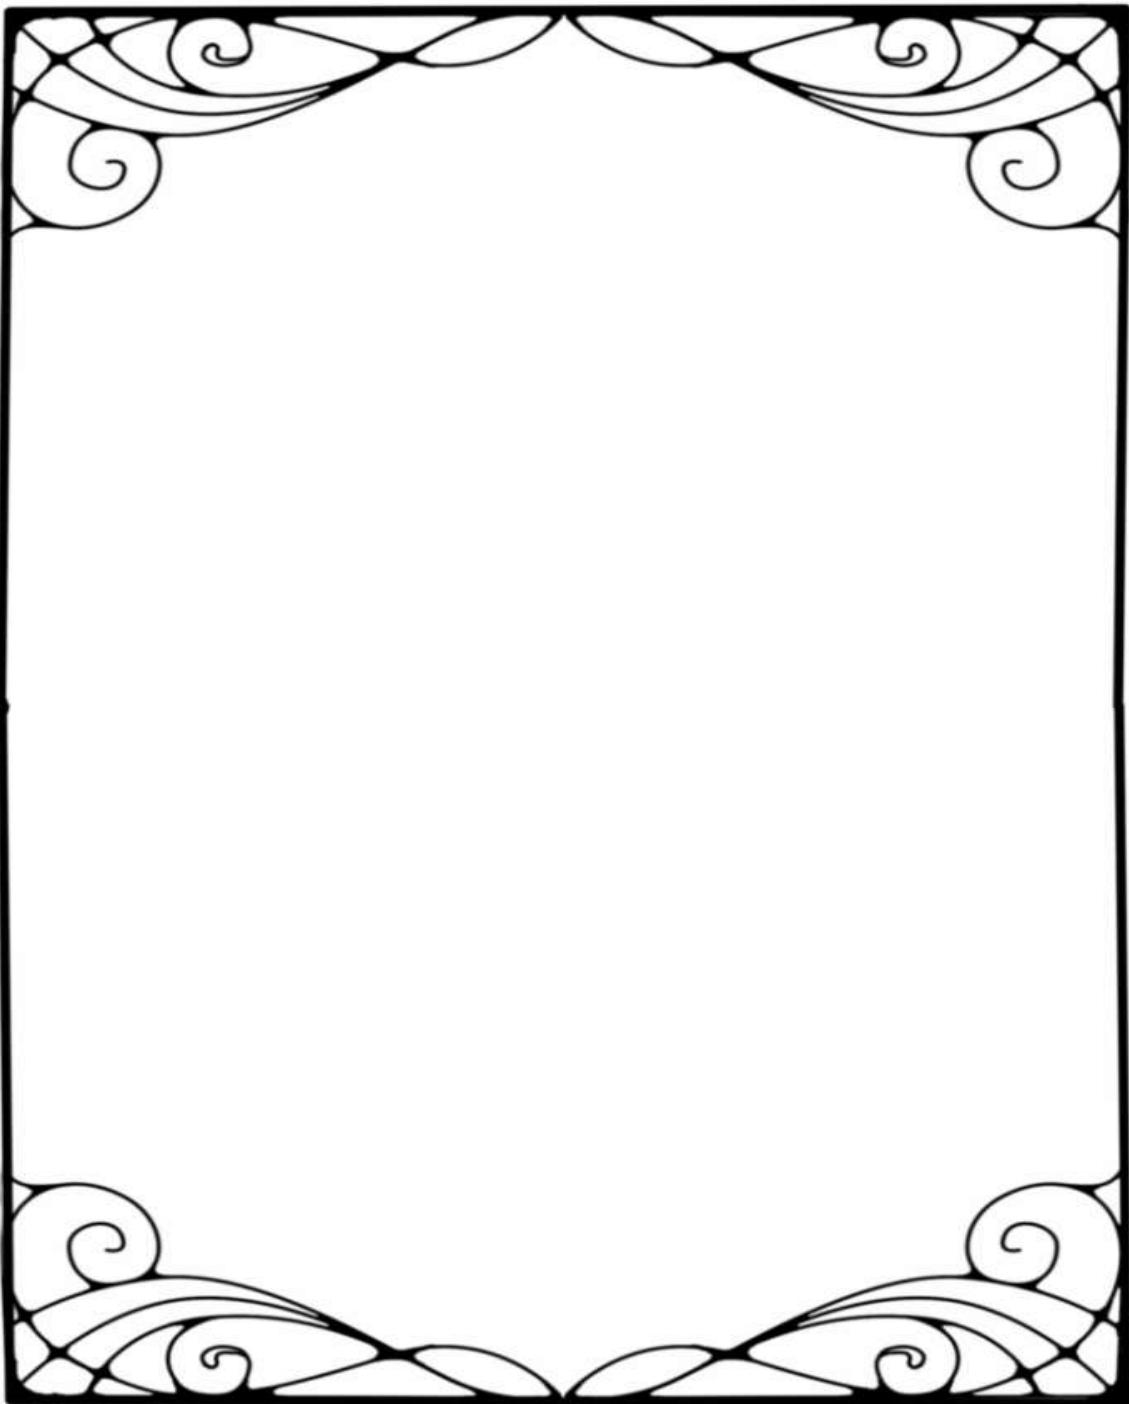

He used interesting shapes and bright colours to create unusual house and hotels.

Draw out some ideas below in the space provided.

My Building Design

Design your own building adding all those unusual ideas, details and of course add a focal point.

Use this page to create your masterpiece! Remember add colour.

Extension Task

Loo/kitchen roll drawing challenge - Using black or blue pen draw out your building design around the cardboard roll - Make it as interesting as possible.

Remember you are creating drawings of buildings!! Not people like the images above!

If you can take a photo and send it into school or save it on your phone till we get back!!

I would love to see your work!

Have fun everyone!!!!
