

## Child Development

### What does the qualification cover?

At Coombeshead Academy we are committed to providing a broad curriculum with a career pathway to suit all students and that is why we offer BTEC Level 1/2 Tech Award in Child Development. The Award gives learners the opportunity to develop applied knowledge and understanding of child development and growth up to the age of five, how children learn through play and how meeting the needs of individual children will support their development, play and learning. In a practical learning environment, learners will have the opportunity to develop knowledge and technical skills in the following areas:

- the characteristics of children's development from birth up to five years
- factors that affect growth and development
- the importance of play
- how play promotes children's learning and development
- reasons why children may need support
- child-friendly environments to support play, learning and development in children from birth to five years old
- supporting all children to learn and develop physically, intellectually, emotionally and socially, and adapting activities to support children's play, learning and development.

### What can the qualification lead to?

Study of the qualification as part of Key Stage 4 learning will help learners to make more informed choices for further learning either generally or in this sector. The choices that learners can make post-16 will depend on their overall level of attainment and their performance in the qualification. Learners who generally achieve at Level 2 across their Key Stage 4 learning might consider progression to:

- A Levels as preparation for entry to higher education in a range of subjects
- study of a vocational qualification at Level 3, such as a BTEC Level 3 National in Children's Care, Learning and Development or a vocational qualification in a related sector such as a BTEC Level 3 National in Health and Social Care. These qualifications prepare learners to enter employment or apprenticeships, or for a move to higher education to study a degree in the early childhood or childhood and youth areas or in related sectors such as nursing and social care.
