

Kingsclere Primary School Year R Home Learning:

Colour

Rainbow Hunt.

Go round your house and find things from each of the colours of the rainbow. sort them into the colours. arrange them in a rainbow. take a photo of your rainbow. Keep a record of how many objects you find that are the different colours. Make a chart of the colours to show how many there are.

Elmer

Read Elmer https://www.ashprimaryschool.co.uk/images/downloads/Its_good_to_be_me-Elmer_Presentation.pdf

Create an elephant for Elmer day. it can be drawn, painted, model, play dough - whatever

The world around us.

Look out of a window and see what colours you can see in the outside world. How many colours can you see? Are there lots of things that are the same colour but different shades? Can you find examples of the same things in books or pictures in your home? Compare the outside and the inside version and see if you can spot any differences. You could draw some of the things you find.

Rainbow patterns.

Choose a different writing pattern to fill each section of the rainbow. (zig zags, circles, dotted lines, spirals, straight lines etc) If you have the colours at home you could even write in the colours of the rainbow.

Colour Hunt

Go on a colour hunt around your home and draw something in each box.

Dance

Can you make up a colour dance? Maybe you could be a rainbow or maybe you could choose a colour and think what it might look like as a person—a stompy angry red or a calm, flowing blue.

Pattern and shape

Make a repeating pattern using coloured objects in your home.
