What will I be studying?

Health and social care is a subject that has many topic areas and is a good foundation subject for a wide range of careers.

In general, it's about people, their health, individual circumstances and what affect individuals.

Your learning will explore what healthcare and social care services are and how different job roles support people to meet their individual needs.

First year – Certificate

One exam assessed unit – Principles of health and Social Care

Two mandatory supervised assignments called NEA's (non-examined assessment)

- ✓ FO92 - Person-centred care and
- ✓ FO93- Supporting people with mental health conditions

You will have an opportunity to resit your exam and there will be a chance to improve and resubmit some of your assignment work

Second year – Extended Certificate

One exam assessed unit – Anatomy & Physiology for health and social care

Two supervised assignments called NEA's (non-examined assessment) likely to be:

- ✓ FO94 - Supporting people with long term physiological conditions
- ✓ FO96 - Supporting people in relation to sexual health, pregnancy and postnatal health

Your teachers will deliver the course content using a wide range of teaching methods.

Checklists will be provided for each unit and you can monitor your own learning by ticking off the content as you go along .

You may be considering a career which requires a university degree and are thinking about UCAS points for the AAQ.

If you have any others, you think are good, let us know 😊

Health and Social Care in the Media

It is important to have a **broad understanding** of health care and social issues which affect services and professionals working for the NHS. One way of raising your awareness is to **prepare you before your course** starts with summer learning using different forms of media.

Your task is to pick...

- 2 Films
- 1 Book
- 2 Documentaries

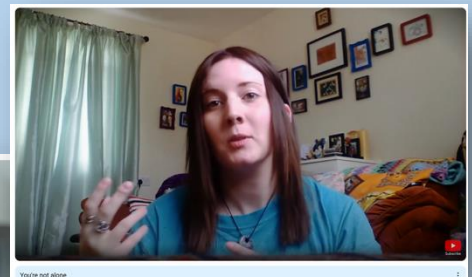

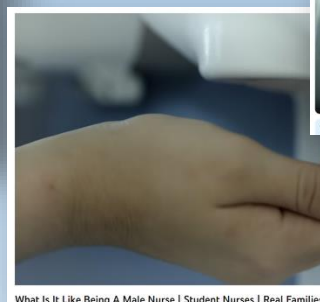

You are then tasked with writing a report which is to be a **minimum** of half an A4 page with the following title: **'Discuss the issues [in the film/book or documentary] and impact on health care provision'**

You must watch or read using examples on the previous slides/pages or another media resource relevant to your learning.

Consider the following:

- What issues, if any, are being raised in the stimulus? E.g. dementia
- How does the stimulus present health? E.g. care for people with dementia
- Explain why the topic of the media source is relevant to your learning and whether you think it is helpful and why?

This list is NOT exhaustive there may be other questions/ideas you wish to consider as you watch or read – it would be lovely to share with us all.

Learning Log

Record here any additional reading/viewing you are undertaking in order to show what you have been completing in order to prepare you for the course. Use the reading list on the previous slides you have been given for guidance on what you could you watch/read/research

Passport to Sixth Form

Check list

Use this list to make sure you have everything you need to hand in in September in order to start your AAQ Health & Social Care course.

Report/review on your chosen film, documentary and book in the media, page 8.

Complete at least a minimum of 5 sections of the learning log, page 9.

Have an A4 ring binder and dividers ready for learning materials

Pencil case with pens, high lighters, pencil and rubber.

A positive attitude, a lovely smile and be ready to be yourself 😊
