Top Tips!

- Practise little and often. Use your time wisely – could you practise on the way to school or while waiting in a queue at the supermarket?
- Can you write your date of birth in Roman numerals?
- Can you write the year in Roman numerals?
- See if you can list places that Roman numerals are used e.g. clocks, architecture. BBC productions list the date in Roman numerals.
- Discuss the reasons why we changed to our current number system and how it's easier. Discuss the fact that our number system is a base 10 system – why do you think this is? (because we have 10 fingers).
- Revisit – You may think you know your target facts after one week, but if you don't practise regularly, you'll soon forget! Keep revisiting old facts regularly to keep them locked in your head!
