"Studying these courses at A-Level has really built my confidence in creativity and opened my eyes to what I could do in the future"

Post 16 Student

# THE — COURSES

TAILORED TO SUIT YOUR CREATIVE SKILLS

## ART CRAFT & DESIGN

Art & Design focuses on traditional techniques and processes including drawing, painting, printmaking and mixed media. You will be taught through a series of practical workshops and focused projects before working on a Personal Investigation of your choice.

You will develop your critical analysis and understanding of Art History by studying a variety of historical and contemporary artists.

## PHOTOGRAPHY

Photography focuses on all aspects from darkroom practice through to digital techniques and processes including Photoshop and multi-media. You will be taught through a series of practical workshops and focused projects before working on a Personal Investigation of your choice.

You will develop your critical analysis and understanding of Photography by studying a variety of historical and contemporary practice working in a variety of photographic genres..

## TEXTILES

Textiles focuses on traditional and contemporary techniques. You will learn a variety of creative skills to work in the Fashion Industry including design and sewing machine skills, pattern cutting, garment construction, decorative techniques, processes, printmaking, embroidery and fabric dyeing. You will be taught through a series of practical workshops and focused projects before working on a Personal Investigation of your choice.

You will develop your critical analysis and understanding of Textile Art History by studying a variety of historical and contemporary artists.

## GRAPHICS

Graphics focuses on a variety of graphic and design areas. You will learn a variety of handmade and digital techniques and processes including illustration, typography, branding and multi media. You will be taught through a series of practical workshops and focused projects before working on a Personal Investigation of your choice.

You will develop your critical analysis and understanding of illustration and design by studying a variety of artists working in the creative industries.

"The teachers really helped me in developing the right skills because they've all worked in the industry"
