

CURRICULUM AIMS AT THE COPPICE

*'Happy, Confident and Successful
Learners: Well Prepared for Life.'*

As a result of children being taught the Coppice curriculum, we aim to empower children to be knowledgeable, ambitious, curious, resilient and empathetic.

KNOWLEDGE

Coppice children will place a high value on knowing and remembering more, developing a breadth and depth of powerful knowledge across distinct subject disciplines. They will combine and apply this knowledge to deepen understanding across the curriculum.

CURIOSITY

Coppice children will develop a thirst for knowledge and will be brave enough to question the way of the world and global issues. They will engage with a diverse range of role models and form their own responses to culturally significant people and their work.

AMBITION

Coppice children will be encouraged to be the best that they can be. They will set aspirational goals and have high expectations of themselves and their learning. They will take pride in their work and be confident enough to share it with a wider audience.

RESILIENCE

Coppice children will work hard and embrace the challenge that comes with achieving their goals. They will develop the confidence to take risks and approach challenges positively. They will welcome feedback and see mistakes as learning opportunities. They will not give up and will accept that practice is a key to success.

EMPATHY

Coppice children will learn social and emotional skills and vocabulary. They will be supportive of one other and develop a sense of community. They will appreciate diversity and gain insights into the experiences and perspectives of others. They will develop a social conscience through discussion of world issues and ethical dilemmas.

The curriculum is at its best when these five drivers reinforce each other and intertwine.
Through our curriculum, we aim to leave no talent undiscovered.
