

Kennicott Results

Students at Kennicott achieve incredible results across the academic subject range. Our outcomes put us in the top bracket of 16-19 colleges in the South West, out-performing many local providers including a number of selective schools.

2026 has been another highly successful year for Post 16 outcomes at Kennicott, with 59% of A Level awarded A* to B.

There were strong performances across the subject and qualification range: Harley Hamlet-Jevons achieved Double-Distinction* in Sport, and Grade B in Sociology; Poppy Harris Hargreaves achieved Grade A in English Literature, A* in Mathematics, A in Further Maths and A* in Physics; Grace Hoare achieved Double-Distinction* in Sport and B in Art; Evie Probert achieved A* in Biology, A in English Literature and A in Art and is going to the University of Oxford in September to study English Language and Literature. Tom Kendall goes to Cardiff in September, to study Civil Engineering with his A*, A, A grades in Mathematics, Geography and Physics. Amelie Wojack achieved Triple Distinction* in the Extended Diploma in Art and Design as well as a Grade B in A Level Geography.

Finn Gonski will be heading to the University of Oxford also, having achieved A*, A* A in Music, Geography and Mathematics. Finn's sister Loren will be heading to London to join a highly prestigious choreography course, having built an extensive portfolio on top of her Grade A in A Level Film Studies and Double-Distinction in Performing Arts. Loren describes Kennicott as a place where 'we were surrounded by peers and teachers who let us grow and be ourselves. I had so much support in everything I did both outside and inside college.'

Lara Sofer was delighted with her A* in Biology, A in Chemistry and A in Mathematics. Lara is pleased that she chose Kennicott; she described the Sixth Form as a nurturing place where nobody doubted her abilities and she had the opportunity to achieve her full potential.
