

Name: _____

Date: _____

Life Cycles

Choose the correct words from below and use printed letters to label these two life cycle diagrams:

frogspawn

eggs

tadpole

adult frog

butterfly

froglet

back legs develop

caterpillar

front legs develop

pupa

Name: _____

Date: _____

Parts of a Flower

Copy the functions of the parts of a flower in your best handwriting.

The stigma is on top of the carpel.

The style holds up the stigma.

The ovary contains the eggs.

The anther is at the top of the stamen.

The filament holds up the anther.

Label the parts of a flower using printed letters:

The carpel (female parts)

stigma style ovary

The stamens (male parts)

anther filament

Can you find out about pollination in flowering plants?

Name: _____ Date: _____

Properties of Materials

The objects around us are made from different materials. Materials are either man-made, like paper and glass, or natural, like stone and sand.

Here is a list of materials. Sort them into two groups:

sand

concrete

silk

glass

stone

cardboard

plastic

wool

paper

wood

Natural

Man-made

Write the name of a material that could be described by each of these properties:

sheer _____	absorbent _____
tough _____	brittle _____
rigid _____	durable _____
flexible _____	fragile _____
waterproof _____	smooth _____
transparent _____	malleable _____
opaque _____	pliable _____
coarse _____	uneven _____

Name: _____

Date: _____

Healthy lifestyle

Read and neatly copy this article explaining how sugar can damage your health:

Eating too much sugar can make you gain weight and can also cause tooth decay. The type of sugars that most people in the UK eat too much of are called 'free sugars'. Free sugars are found in foods such as sweets, cakes, biscuits, chocolate, fizzy drinks and juice drinks. For example, a can of cola contains nine cubes of sugar - more than the recommended daily limit for adults. We should eat less of these types of sugary foods.

Sugars also occur naturally in foods such as fruit, vegetables and milk but we don't need to cut down on these types of sugars. For a healthy diet, we must eat less food and drink containing free sugars.

Eating too much sugar can contribute to people having too many calories which can lead to weight gain. Being overweight increases the risk of various health problems.

Sugar is also one of the main causes of tooth decay. Limiting the amount of sugary food and drink to mealtimes only, can help to prevent tooth decay.

Find out the amount of sugar, per 100g, in these foods:

apple _____

tomato ketchup _____

cola _____

baked beans _____

natural yoghurt _____

fruit yoghurt _____

banana _____

milk _____

fresh orange juice _____

coco pops _____
