Key Language and Representations

Word Problems are the arithmetic number sentences written in a real-life reasoning and problem solving scenario. e.g. $15 + 9 = 24$

Number Lines are used to count forwards e.g. 0, 1, 2, 3, 4, 5 and also to count backwards e.g. 10, 9, 8, 7, 6, 5.

Concrete Objects are manipulated or handled to calculate and represent a number sentence i.e. multilink cubes, numicon, counters, number line.

e.g. $3 + 3 = 6$  +  = 

Column Addition is the formal written method of adding two or more numbers together, using a vertical arrangement in a columnar format.

$$\begin{array}{r} \underline{1s} \\ 3 \\ + 5 \\ \hline 8 \end{array}$$

$$\begin{array}{r} \underline{1s} \\ 2 \\ + 1 \\ + 3 \\ \hline 6 \end{array}$$

$$\begin{array}{r} \underline{10s} \ \underline{1s} \\ 1 \ 9 \\ + 1 \ 2 \\ \hline 3 \ 1 \\ \hline 1 \end{array}$$

Regroup 10 ones into 1 ten.

Column Subtraction is the formal written method of subtracting a smaller number from a bigger number, using a vertical arrangement in a columnar format.

$$\begin{array}{r} \underline{1s} \\ 3 \\ - 1 \\ \hline 2 \end{array}$$

$$\begin{array}{r} \underline{10s} \ \underline{1s} \\ 2 \ 0 \\ - 1 \ 0 \\ \hline 1 \ 0 \end{array}$$

$$\begin{array}{r} \underline{10s} \ \underline{1s} \\ 1 \\ 2 \ 10 \\ - 1 \ 1 \\ \hline 0 \ 9 \end{array}$$

Regroup 1 ten into 10 ones.

Strategy Applied refers to when a formal written method is used to calculate a number sentence e.g. $25 - 5 = 20$

Explained using appropriate mathematical language, proven using concrete objects that can be handled, shown with pictorial representations visualising the calculations, to ensure a greater understanding of a mathematical concept

Part Whole Models are pictorial mathematical images to represent **varied** calculations and number sentences.

e.g. $6 + 3 = \underline{?9}$

e.g. $9 - 2 = \underline{?7}$

Bar Models are an image, that pictorially represents a number sentence.

e.g. $3 + 9 = \underline{?12}$

e.g. $20 - 2 = \underline{?18}$

Groups of objects represents a total number of objects shared or divided into two or more groups of an equal number of the objects.

$$\frac{1}{2} \text{ of } 10 = \underline{5}$$
