

OXLEY PRIMARY SCHOOL  
**FOXES & LIONS**

**English**

In English, we continue to study Holes. We will work towards writing a set of instructions on how to survive Camp Green Lake, writing a narrative, using drama and acting to build up to writing a newspaper report, before finally watching the film in order to make comparisons and write a review.

**PE**

In PE, we will continue to develop our athletic skills as well as beginning to learn about hockey.

**PSHE**

In PSHE we will finish our unit on managing change before exploring our unit on relationship and sex education.

**Science**

We have now begun our unit on diet, drugs and lifestyle. In this block, we will be exploring the impacts of diet, drugs and lifestyle on overall body health. We will be using a lot of the knowledge learnt in the previous circulatory system block. We will identify how diet can have positive and negative effects on the heart.

**RE**

We reach our last unit in RE in which we will look into what it means to be Muslim in Britain today. In this unit we will draw on the knowledge we learned on our class trip, starting with the five pillars of Islam.

**Maths**

In maths, we will be consolidating all of our knowledge before looking towards mini projects that will enable us to apply our skills.

**Welcome back Year 6!**

Well, we have got a jam-packed last few weeks ahead!

Please look out for the letter – sent via Weduc – which has all of the details for the up and coming events.

**Year 6 are busy rehearsing for their end-of-year play – which is sure to be a mediaeval extravaganza!**

**We also have our end-of-year treats courtesy of the fantastic amount raised by Year 6 during their enterprise project! Water fights, Macdonalds and inflatables here we come!**

**SUMMER 2**

**Geography**

As we come to the end of our unit on the Mayans, we look back at geography, where we will be exploring how climate change is affecting the world. Why are people making flood plans? What have countries of the world agreed to do about global warming? These are just some of the questions we will be researching.

**Computing**

In computing, we will explore the concept of variables in programming through Scratch. We will relate them to real-world examples and then use variables to create a simulation of a scoreboard.

**Art/DT**

In art, we continue to research and design our own Maya jewellery, in which we will be developing our clay techniques. This links directly with our DT project, where we will be using the designs we previously made to make our own Mayan masks and headdresses.

**French**

In French, we continue to learn about healthy lifestyles before we learn to talk about ourselves in the world.
