

Geography at Belvoirdale

Our carefully structured curriculum builds on geographical knowledge and skills which children use to understand the local area, country and world in which they live in. They will be endowed with enthusiasm and curiosity and the desire to learn more about geography. More than ever, considering the world in which they live in, children will be taught to love and nurture the planet around them, through understanding the processes, environments and wonders of the Earth, both natural and man-made. They will have an understanding of the world, its continents, oceans and environments, and their impact upon them. Our vision is that Belvoirdale pupils leave with an increased confidence and understanding of this world and their roles and responsibilities towards it.

Understand their roles and responsibilities to our world.

Study local, then national, then worldwide geographics.

Develop map reading skills.

Compare the physical and human worlds.

GEOGRAPHY

To create **GLOBAL CITIZENS** who can **explore** and have a **strong empathy** with our world.

Dream it Learn it Live it
